

CHANGING LIVES ONE SMILE AT A TIME—ANOTHER SUCCESS STORY...

# NEWLYWEDS SAY “I Do” TO COSMETIC DENTISTRY

Despite her vibrant natural beauty, Kelly Johnson was never really confident about her smile. Over the years, Kelly visited a number of orthodontists who all offered similar advice: she would need to have several teeth extracted then wear conventional braces for more than a year.

A friend in Virginia insisted she get a consultation with Dr. Maurice Salama, an orthodontist and periodontist, after she moved to Georgia. Dr. Salama had some fresh new ideas about how to straighten Kelly’s crowded teeth and designed a treatment plan that included invisible braces by Invisalign™ for the upper teeth, and traditional braces below. No extractions were required and, best of all, the treatment would be complete in time for Kelly and Adam’s beach destination wedding in Mexico 10 months later!

At the beginning of Kelly’s treatment, she and Adam were apart for about three months. When they reunited, Adam was thrilled with the difference he could already see in Kelly’s teeth. After the orthodontic phase, Dr. Ronald Goldstein added beautiful finishing touches with delicate cosmetic contouring and bleaching to brighten her teeth. Today, Kelly has the smile she’s always dreamed of. See for yourself!

After seeing Kelly’s success, Adam decided he’d like to make some changes too and he’s excited about the results.

Kelly and Adam couldn’t be happier with each other or with their new, sparkling smiles.
